

## Reflection A5: INF133

**Enter names of all group members as they appear on Canvas/UCI roster**

First name	Last name
Darren	Li
Joseph	Haddad

**Is there anything special we need to know in order to run your code?**

No to run the code, all that is required is to load the index.html.

---

**Reflect on any challenges your group faced and how they were overcome for your final project**

The main challenge was using the javascript to make the implementation work correctly displaying the values onto the screen and then having it dynamically update instantly was an issue but we were able to figure out a way to make it work.

---

---

---

---

---

**Reflect on design decisions, which frameworks were chosen and why**

We did not use a framework, what we did was make it using purely javascript because it was easier to do and was not that much trouble in the end.

---

---

---

---

---

**Reflect on future improvements you would consider for your project/collaboration**

In the future we could include more functionality into it, also one issue is that we can change the symbol that is displayed for the currency format since it only shows in dollars at the moment.
